

Cazul B.V. 34 de ani

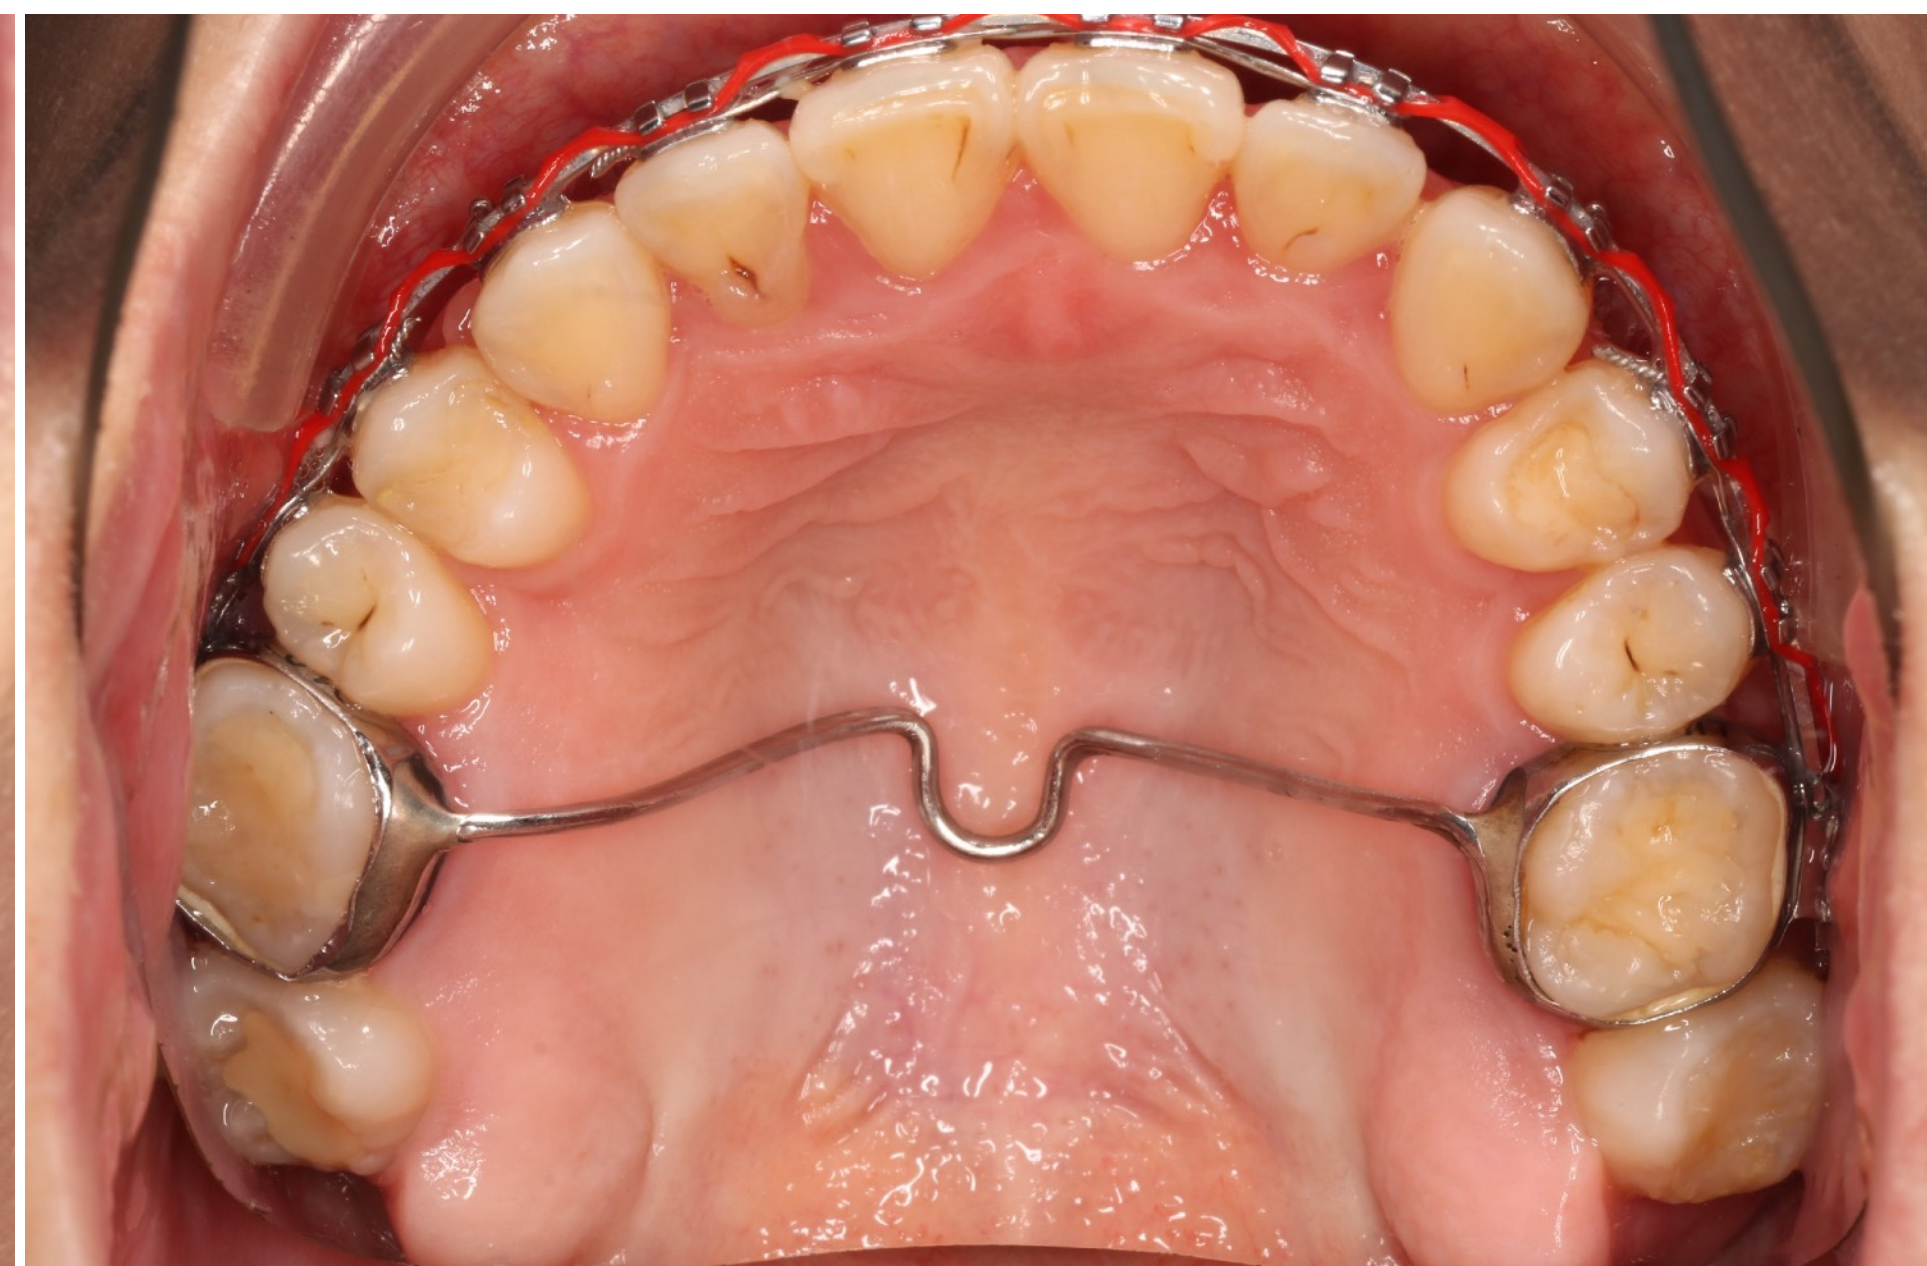

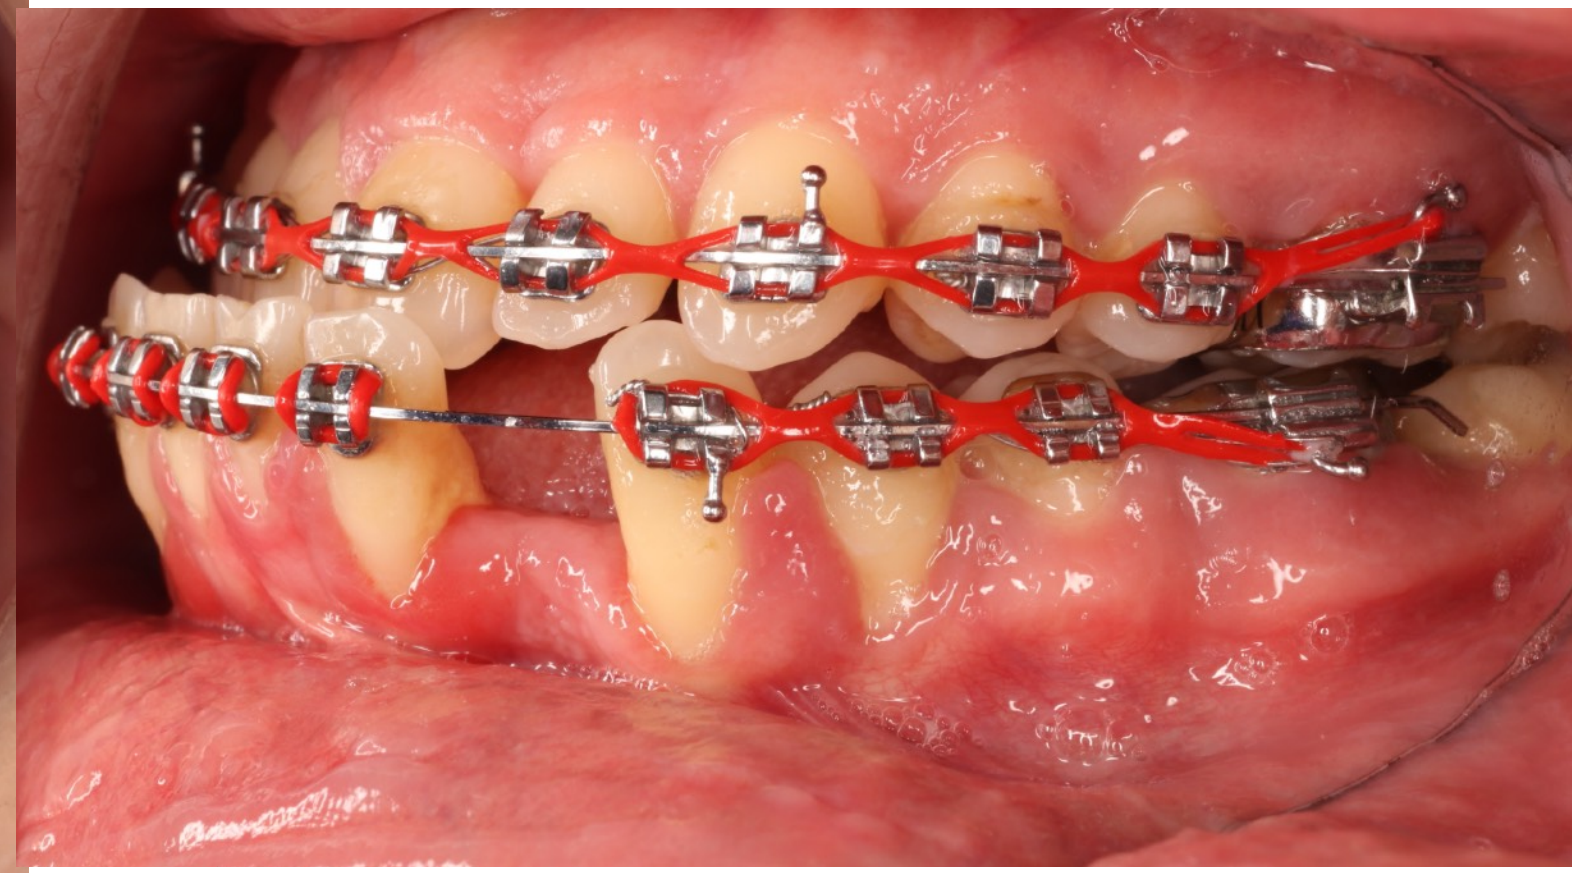

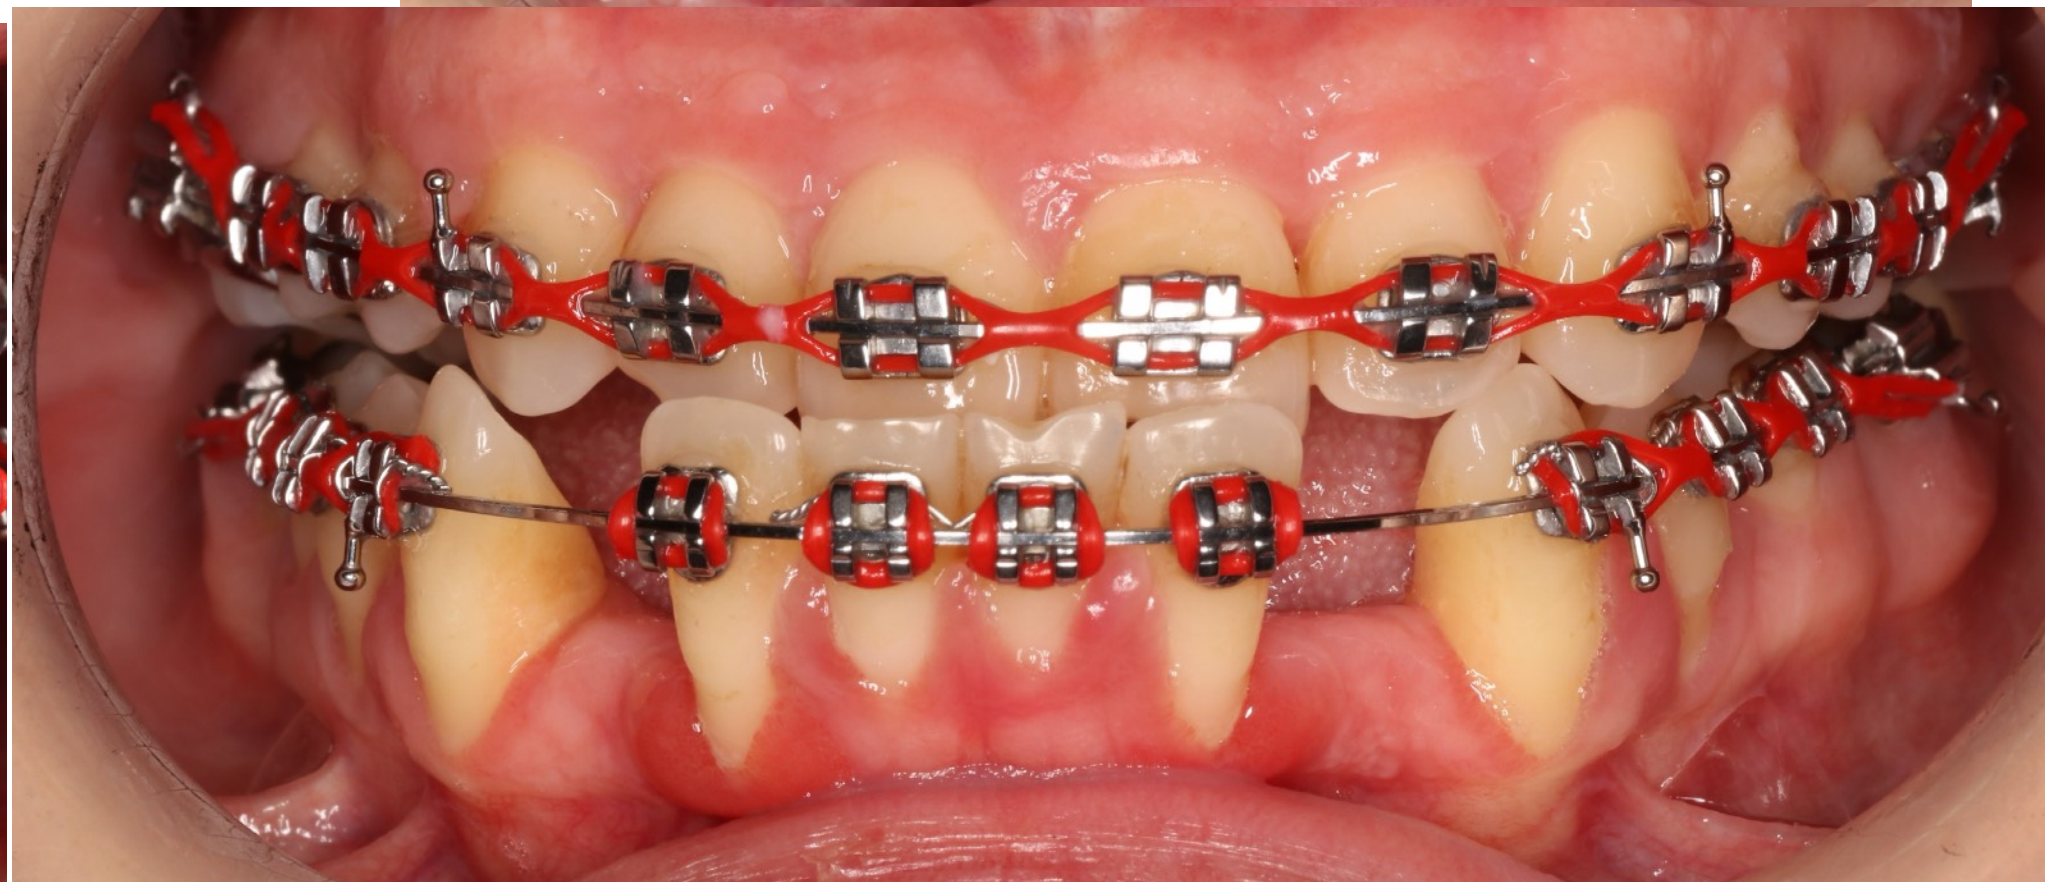

Tratament ortodontic preluat, la rugămintea medicului Parodontolog

Caz aflat în tratament ortodontic de peste 3 ani în momentul preluării.

- 34 ani, pacienta
- Clasa I scheletala
- Ocluzie inversa frontala
- Recesiuni gingivale tipul I Miller: 34,33,32,42,43,44

- **SITUATIA INITIALA LA PRELUAREA CAZULUI**
- **5.03.2024**

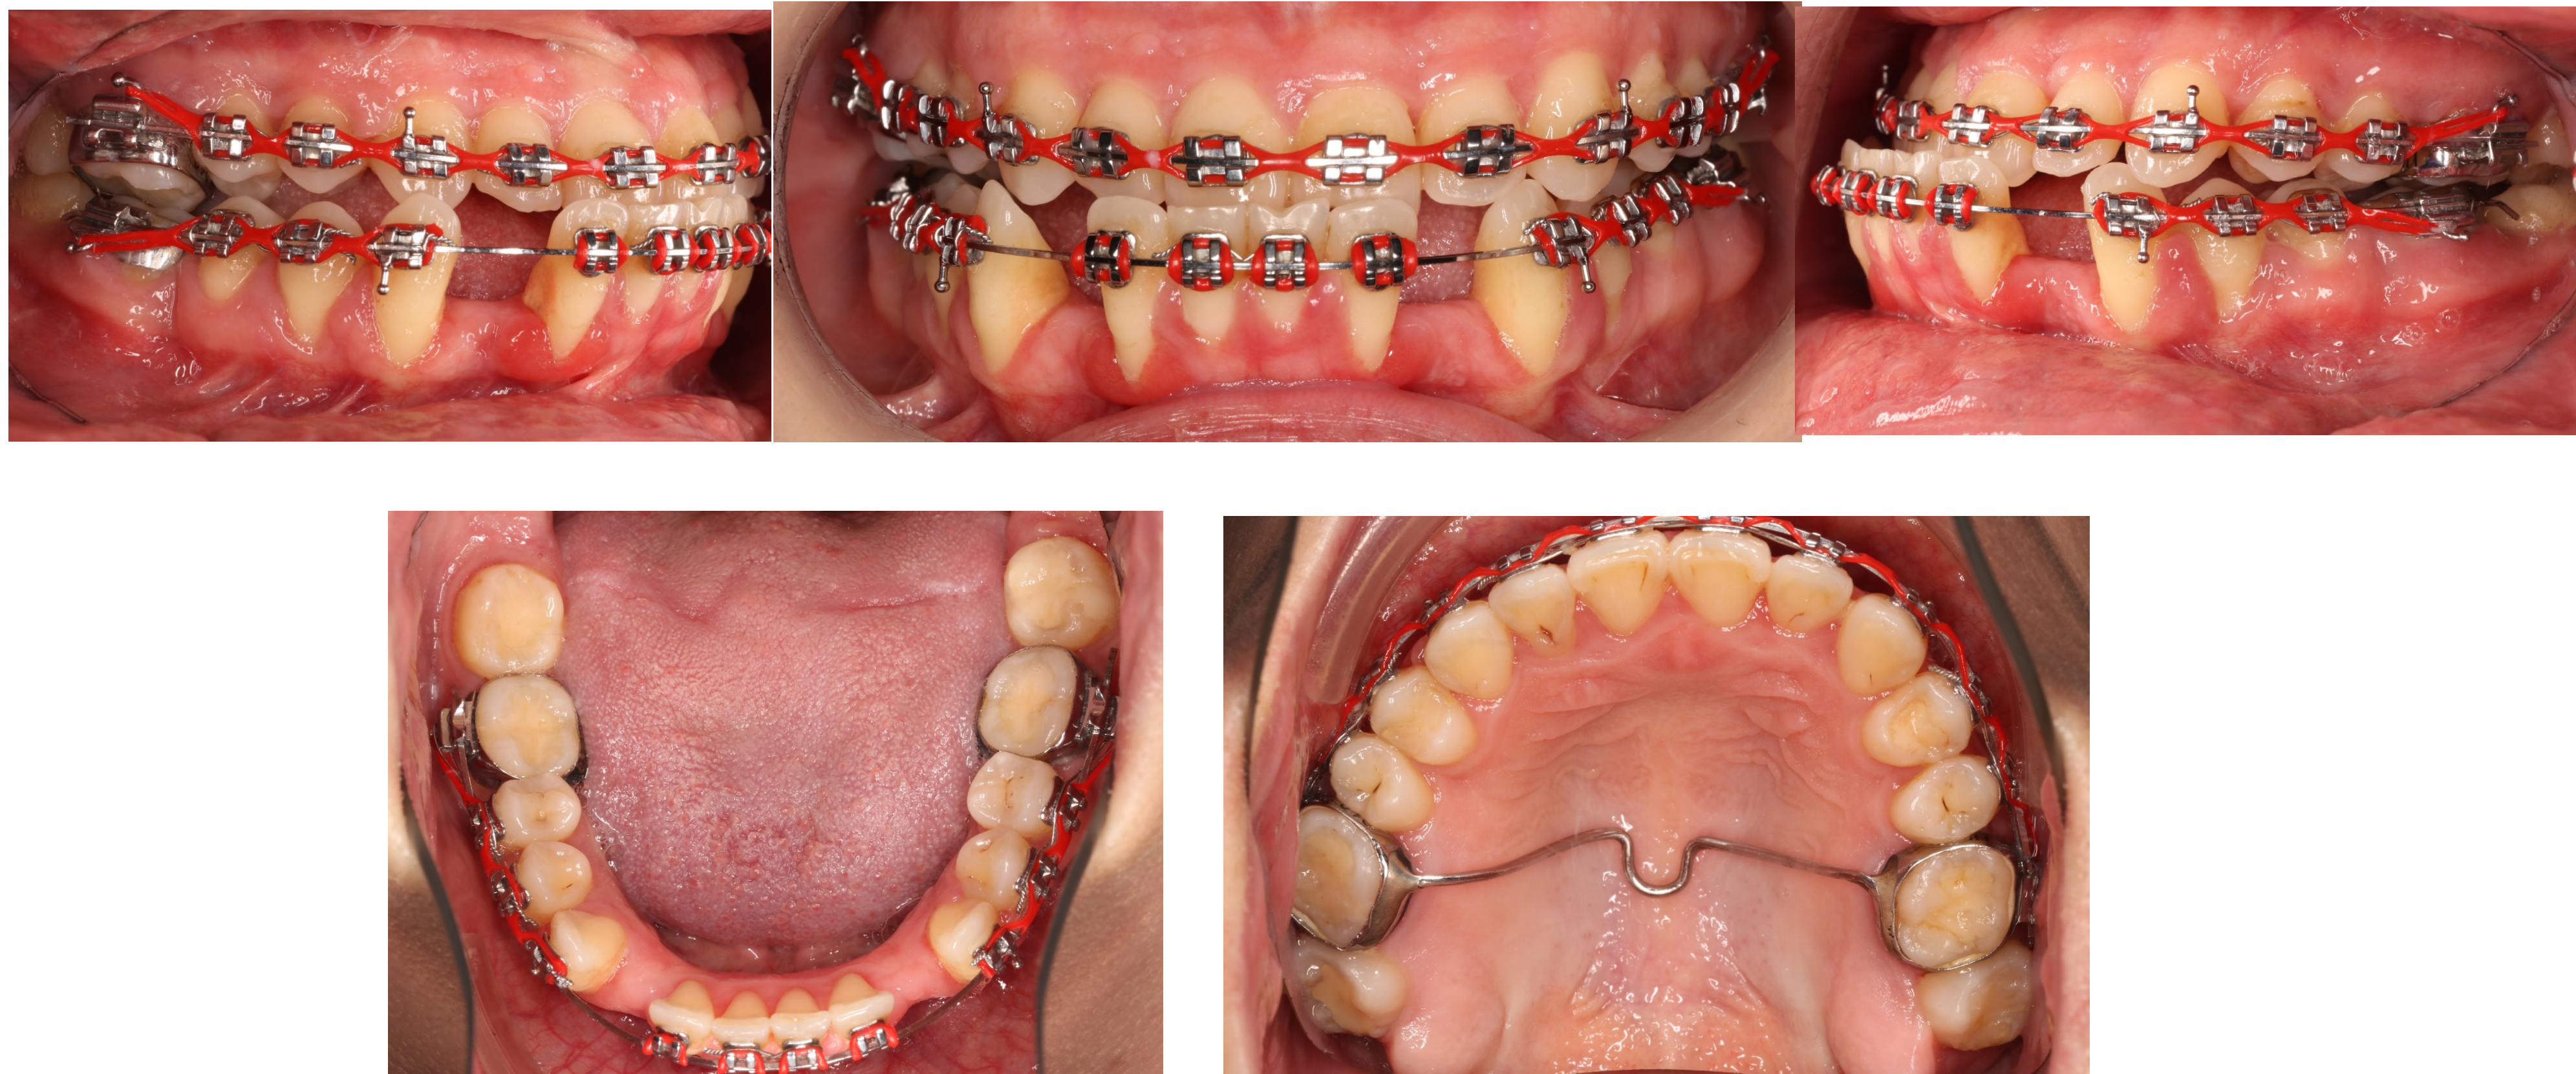

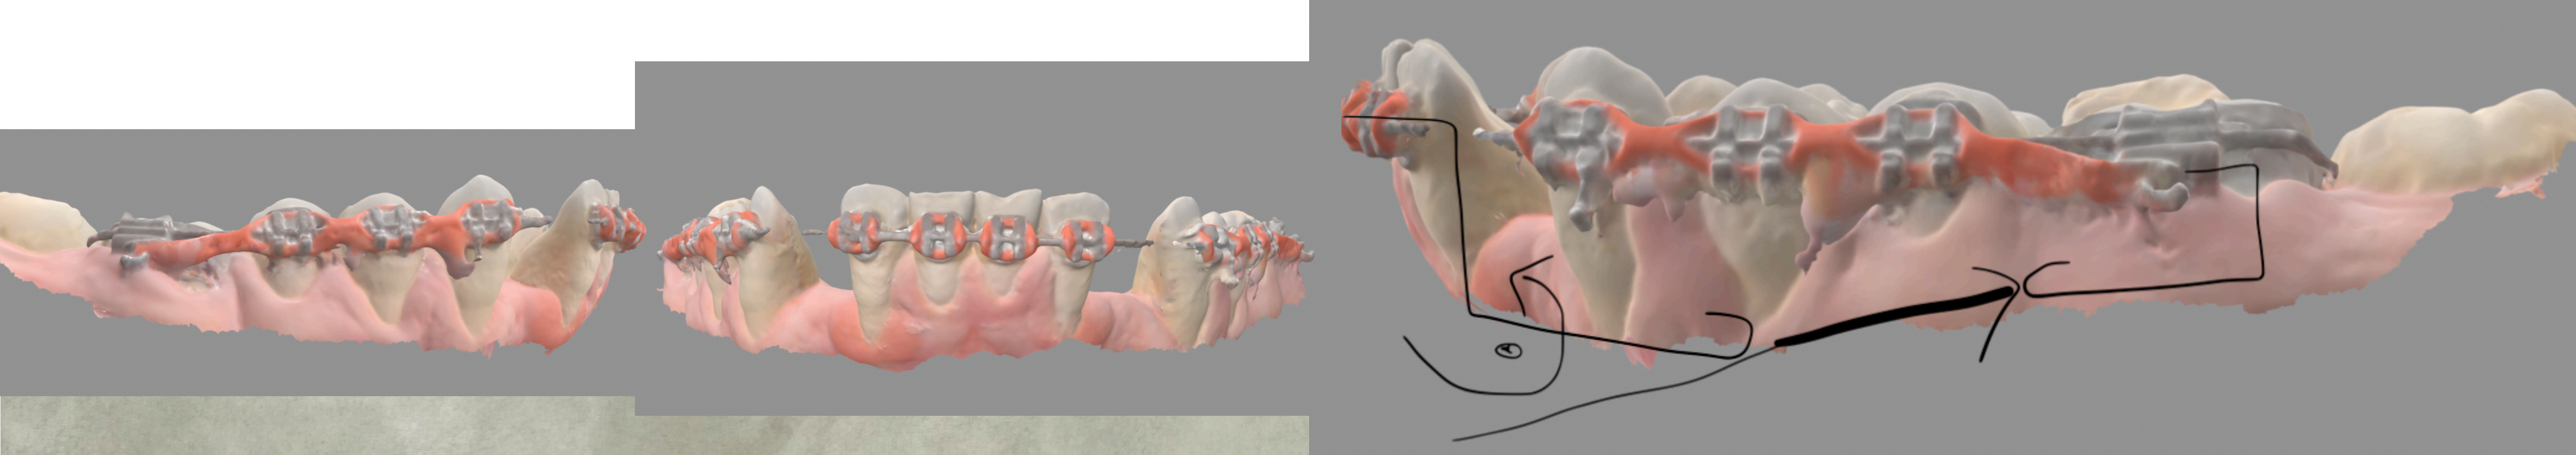

- Arcade dentare asimetrici din cauza arcului transpalatinal sudat la molarii 1 superiori

Strategia Biomecanica:

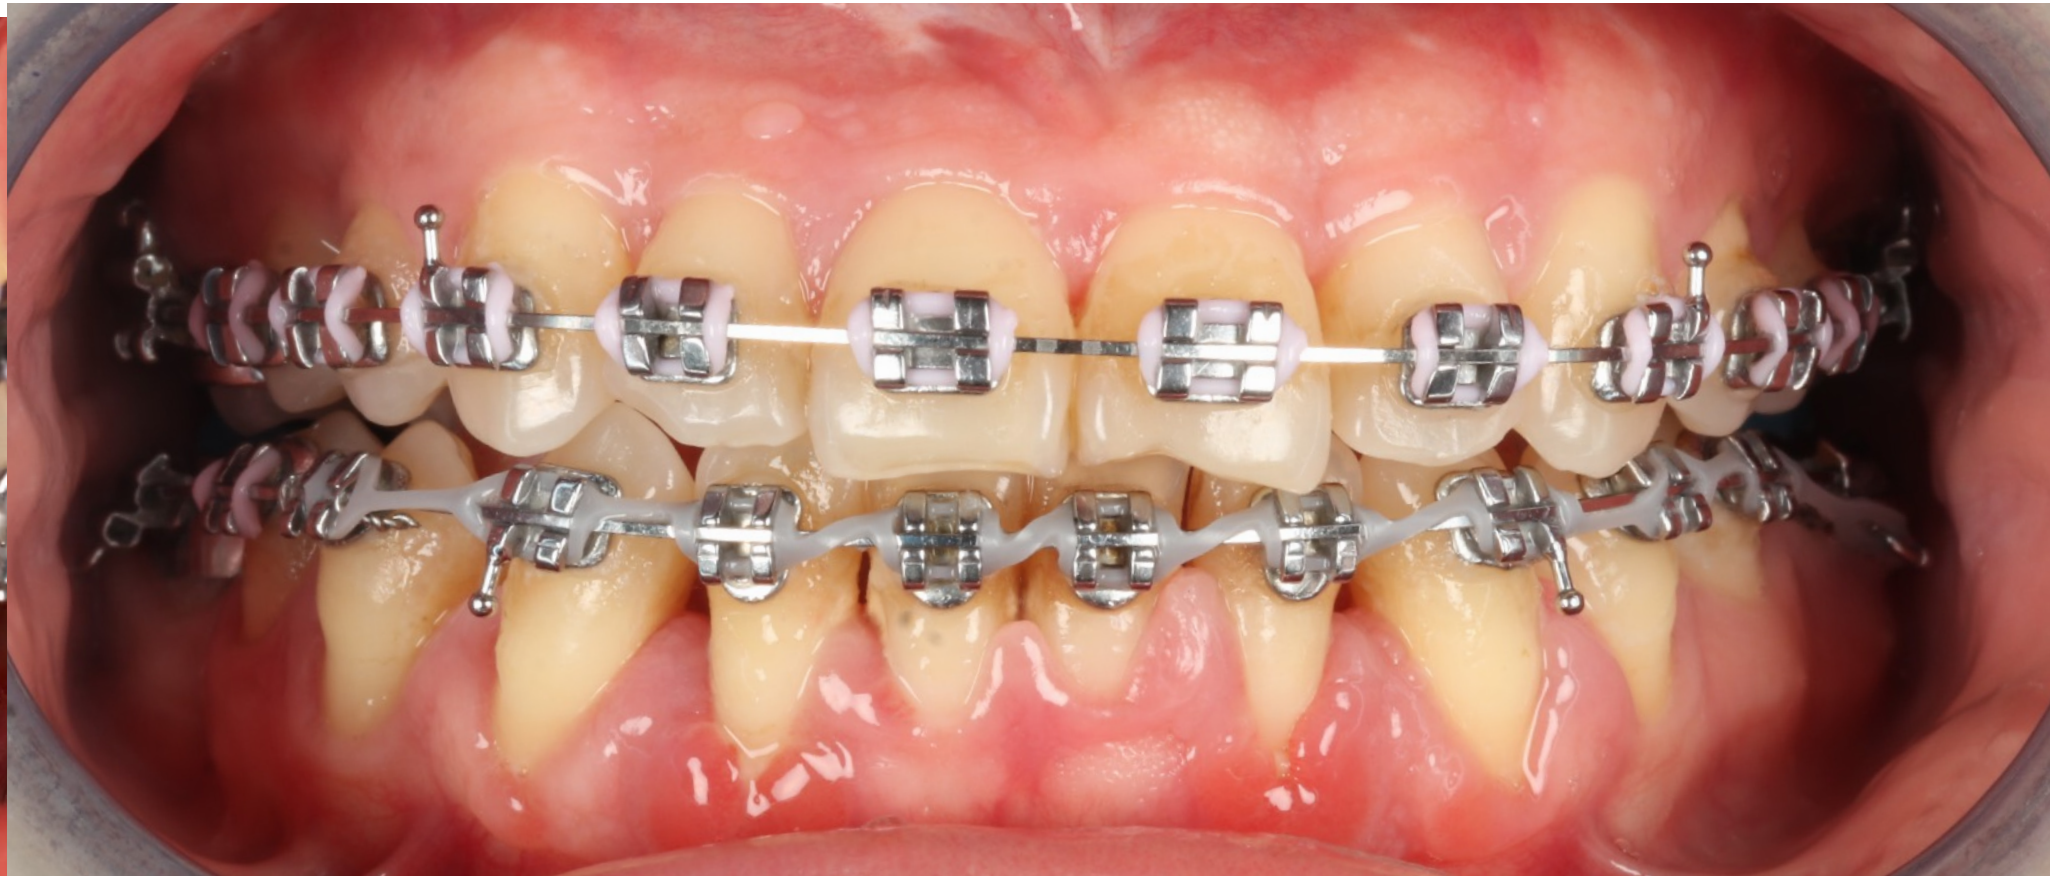

- includerea în tratament a molarilor 2
- îndepărtarea arcului TP sudat
- Deplasare radiculara linguală a 32-42
- Corecție torque 33,34,43,44

Mecanica segmentară pentru a obține deplasarea radiculară a incisivilor inferiori și arc continuu ca bază arh pentru controlul vertical și prevenirea extruziei (efect parazit al retrudării și linguoversiei radiculare)

Faza a doua :
Mecanica simpla straight wire,
Frictionala (sliding mechanics)

- Redpatch 32,42,
- Atasament gingival imbunatatit 33-43

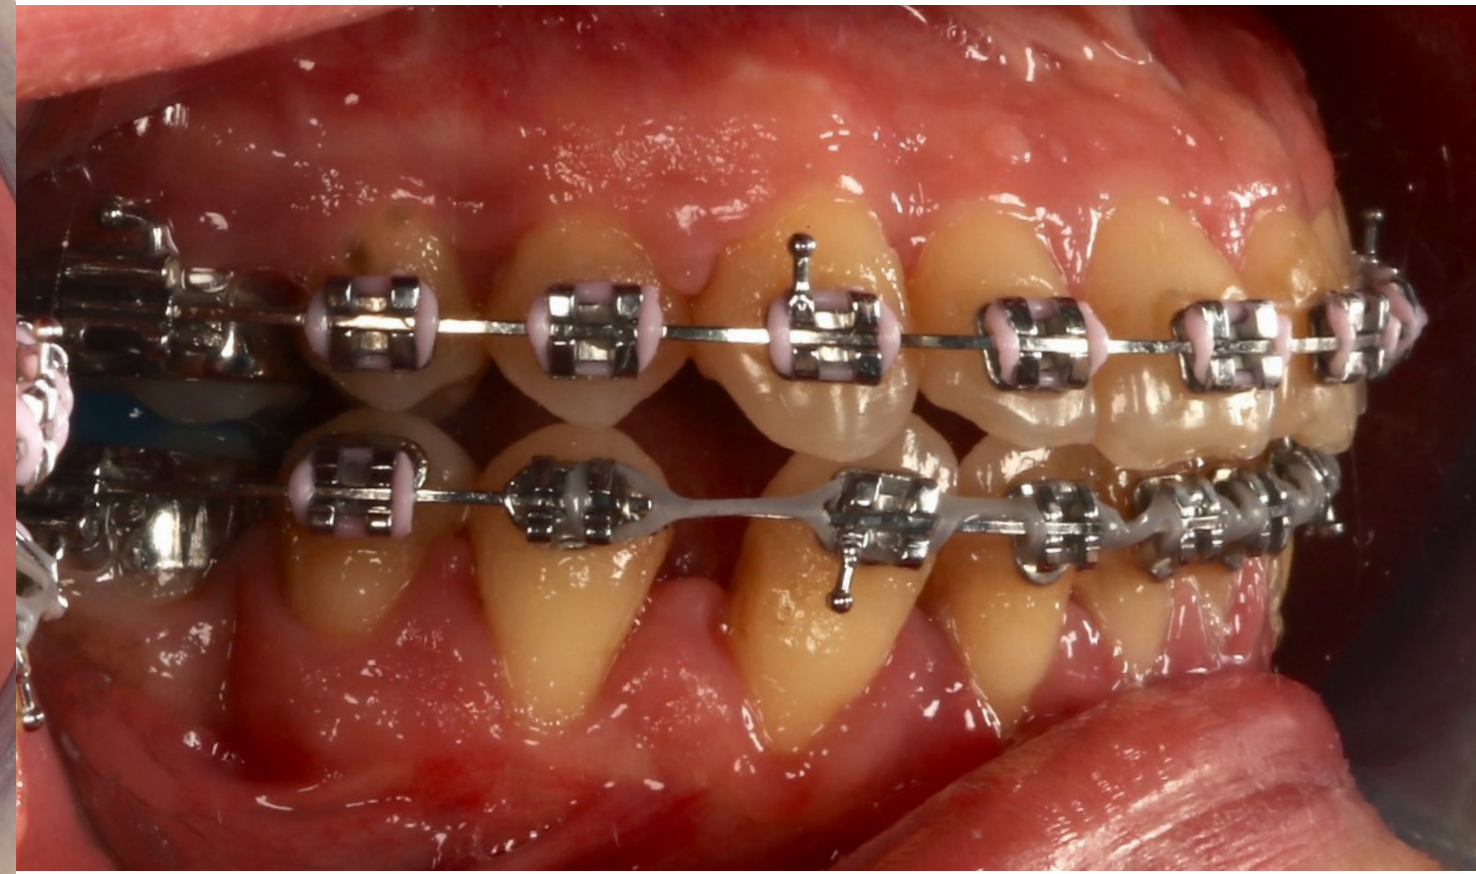

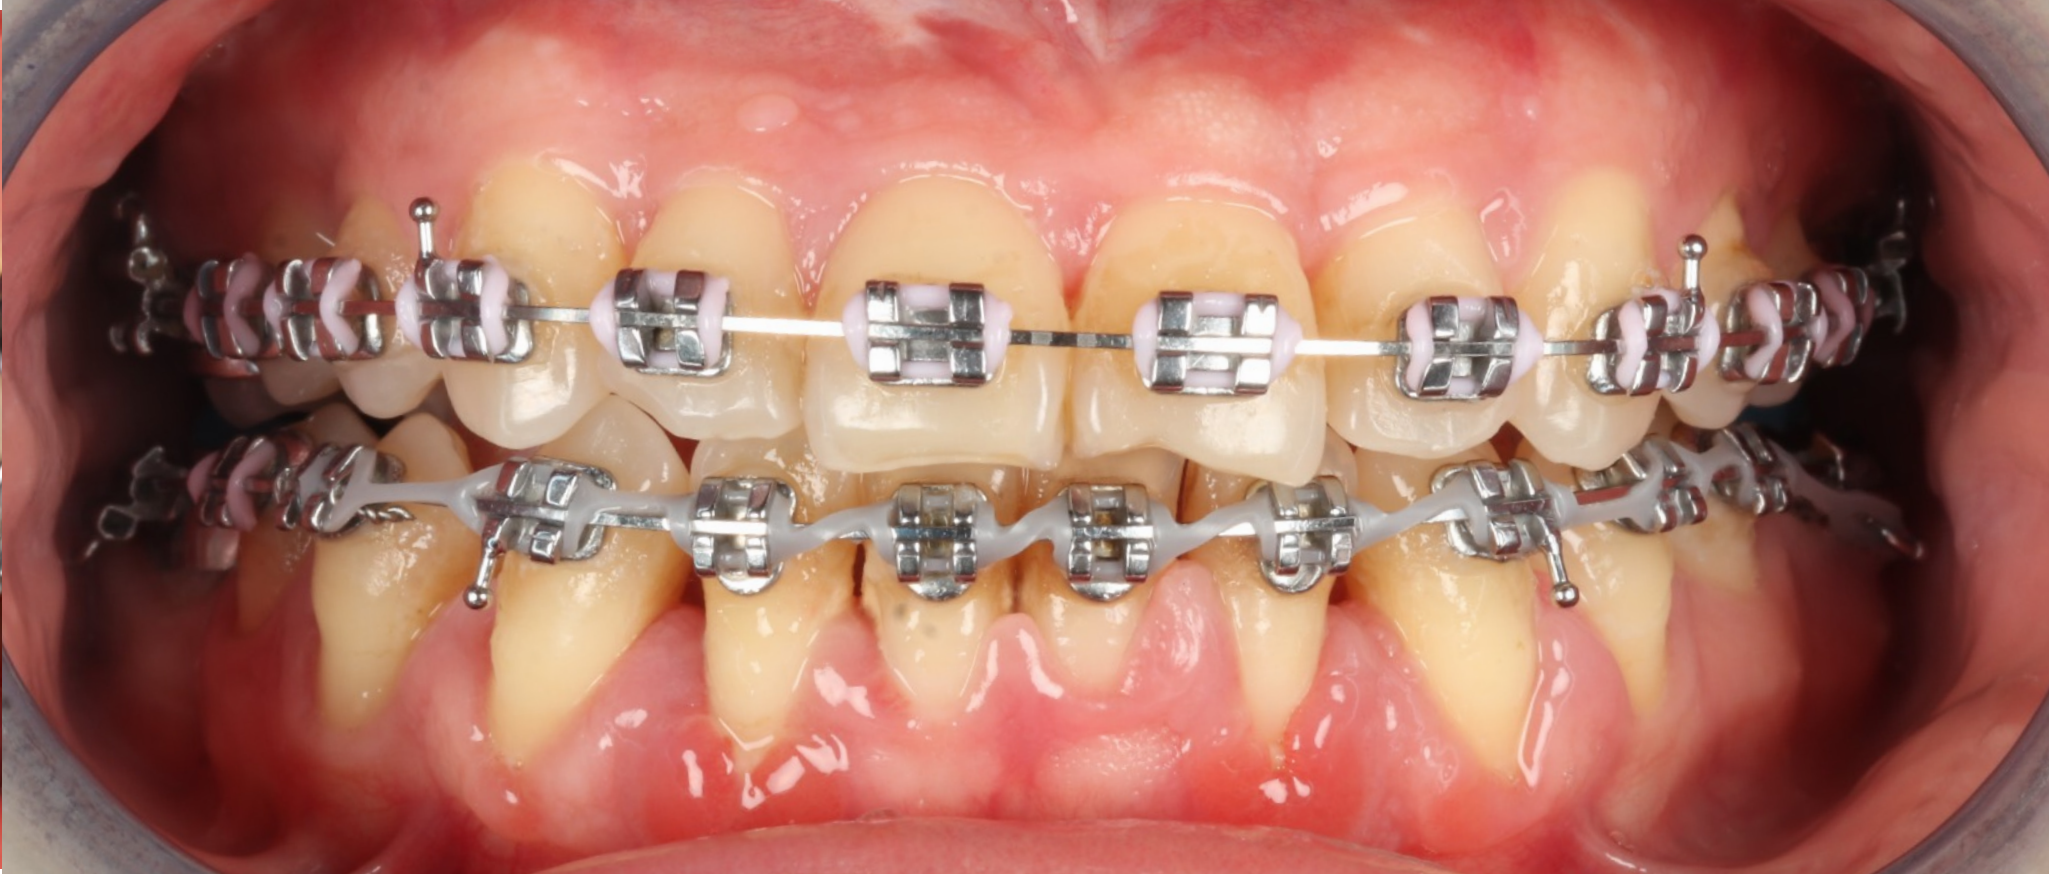

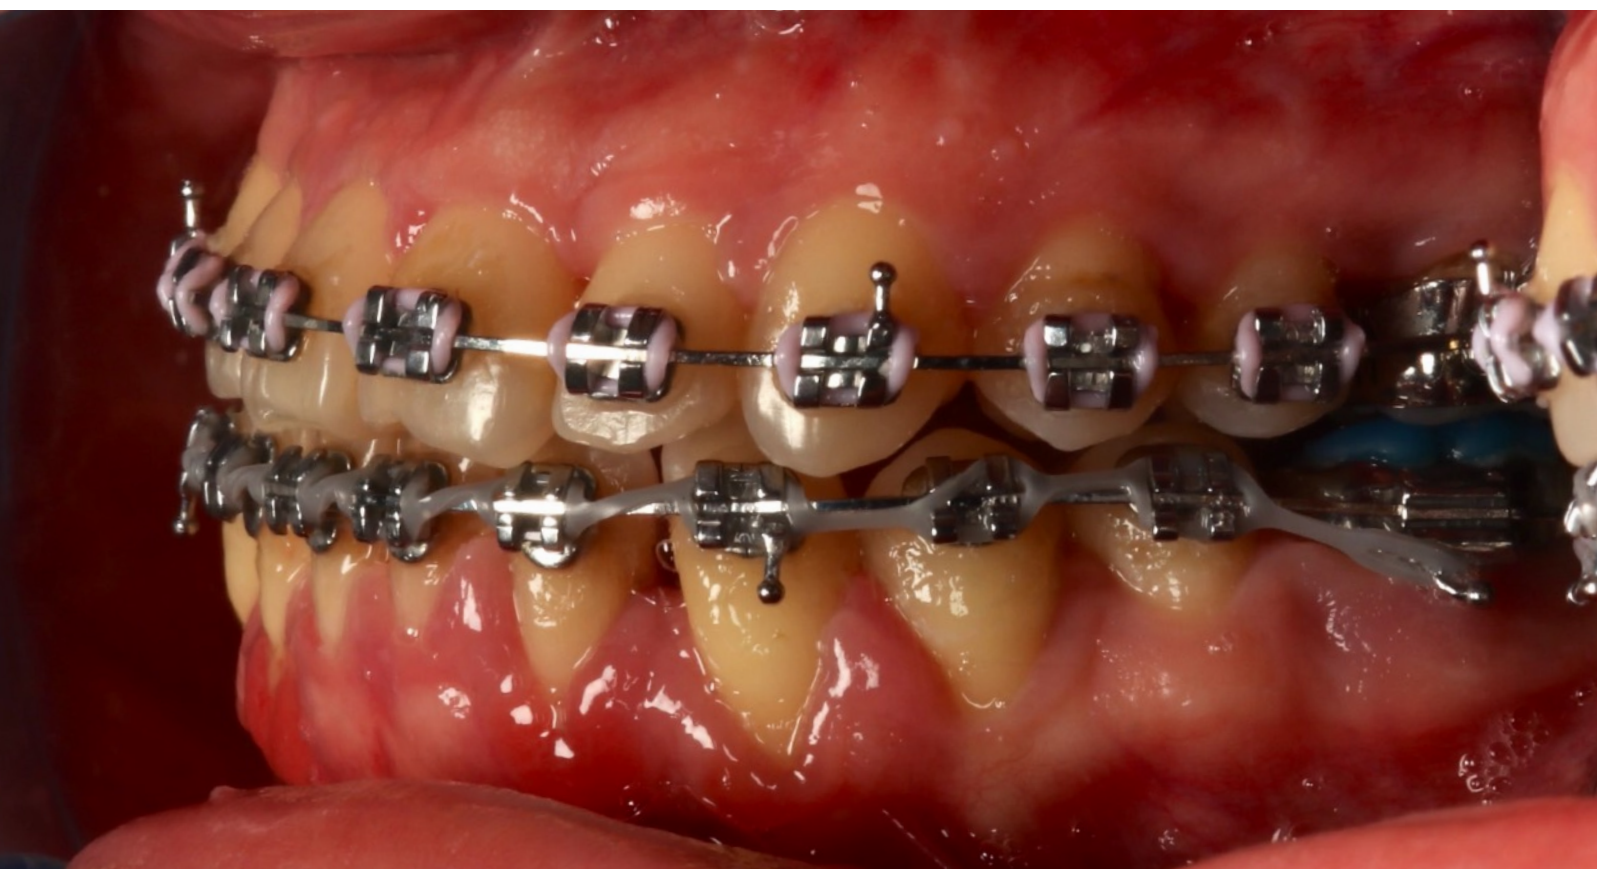

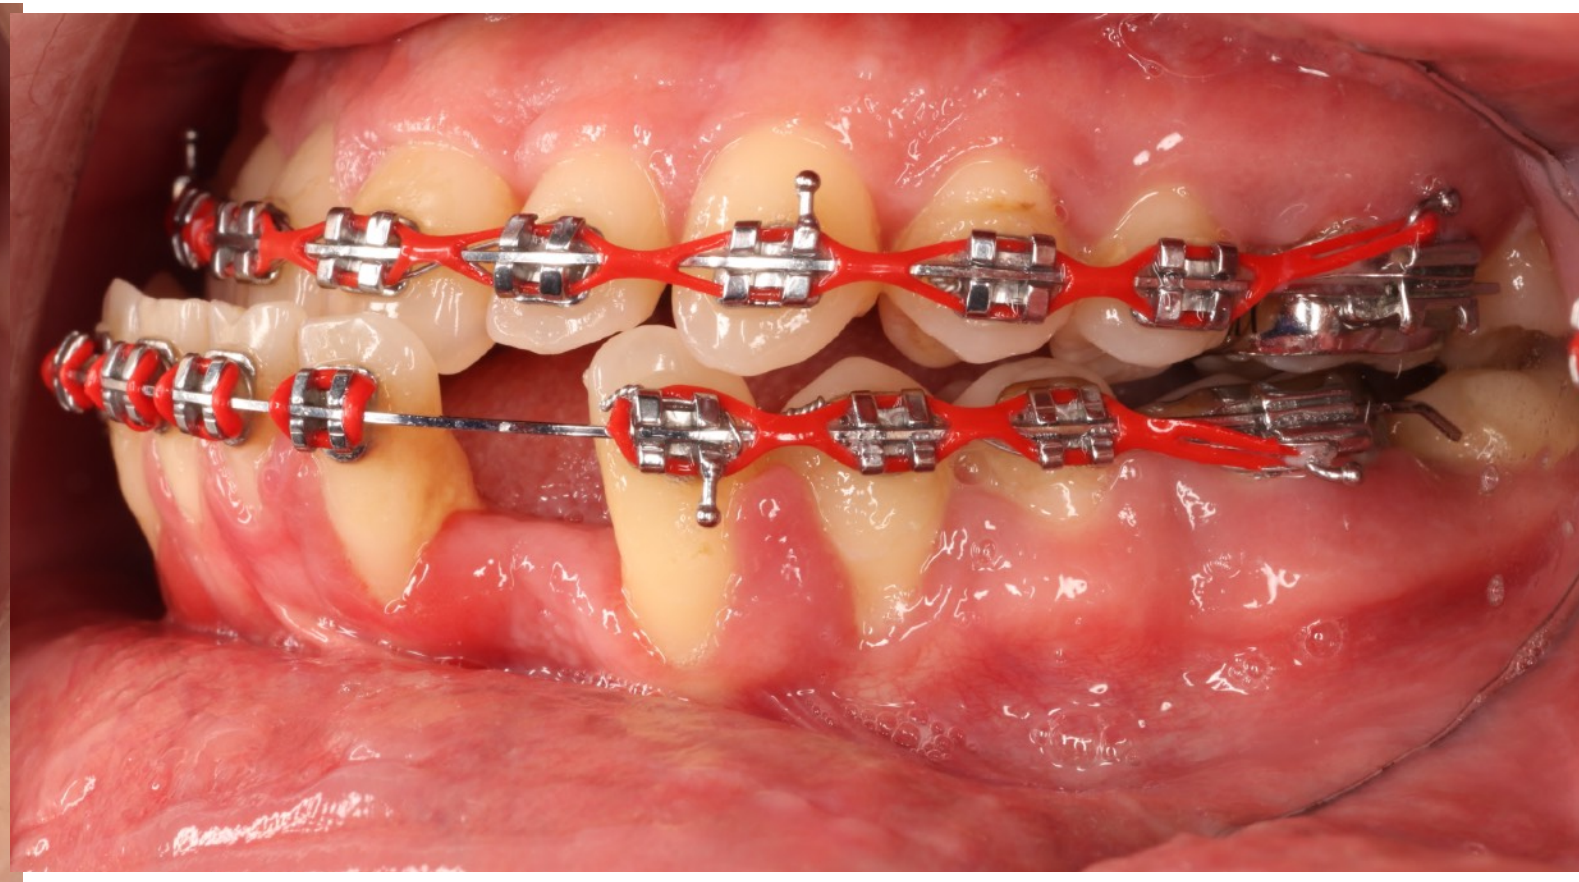

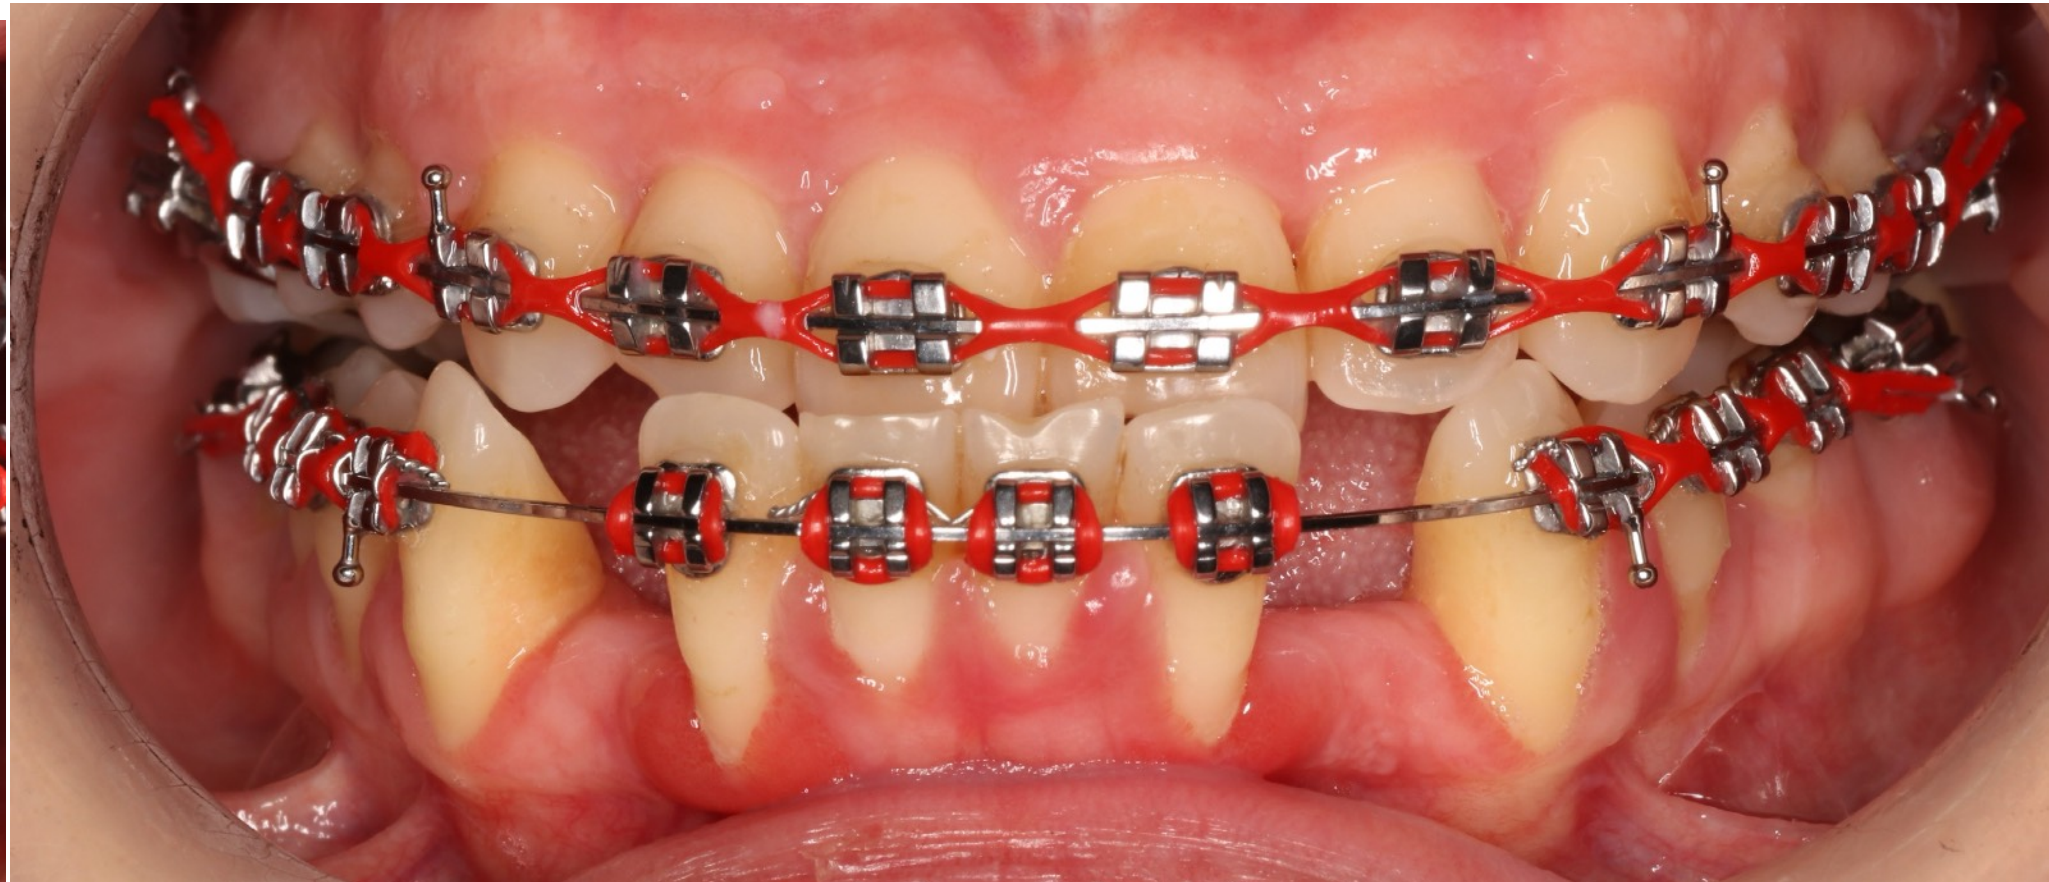

- Situația la final de tratament ortodontic 13.05.2025

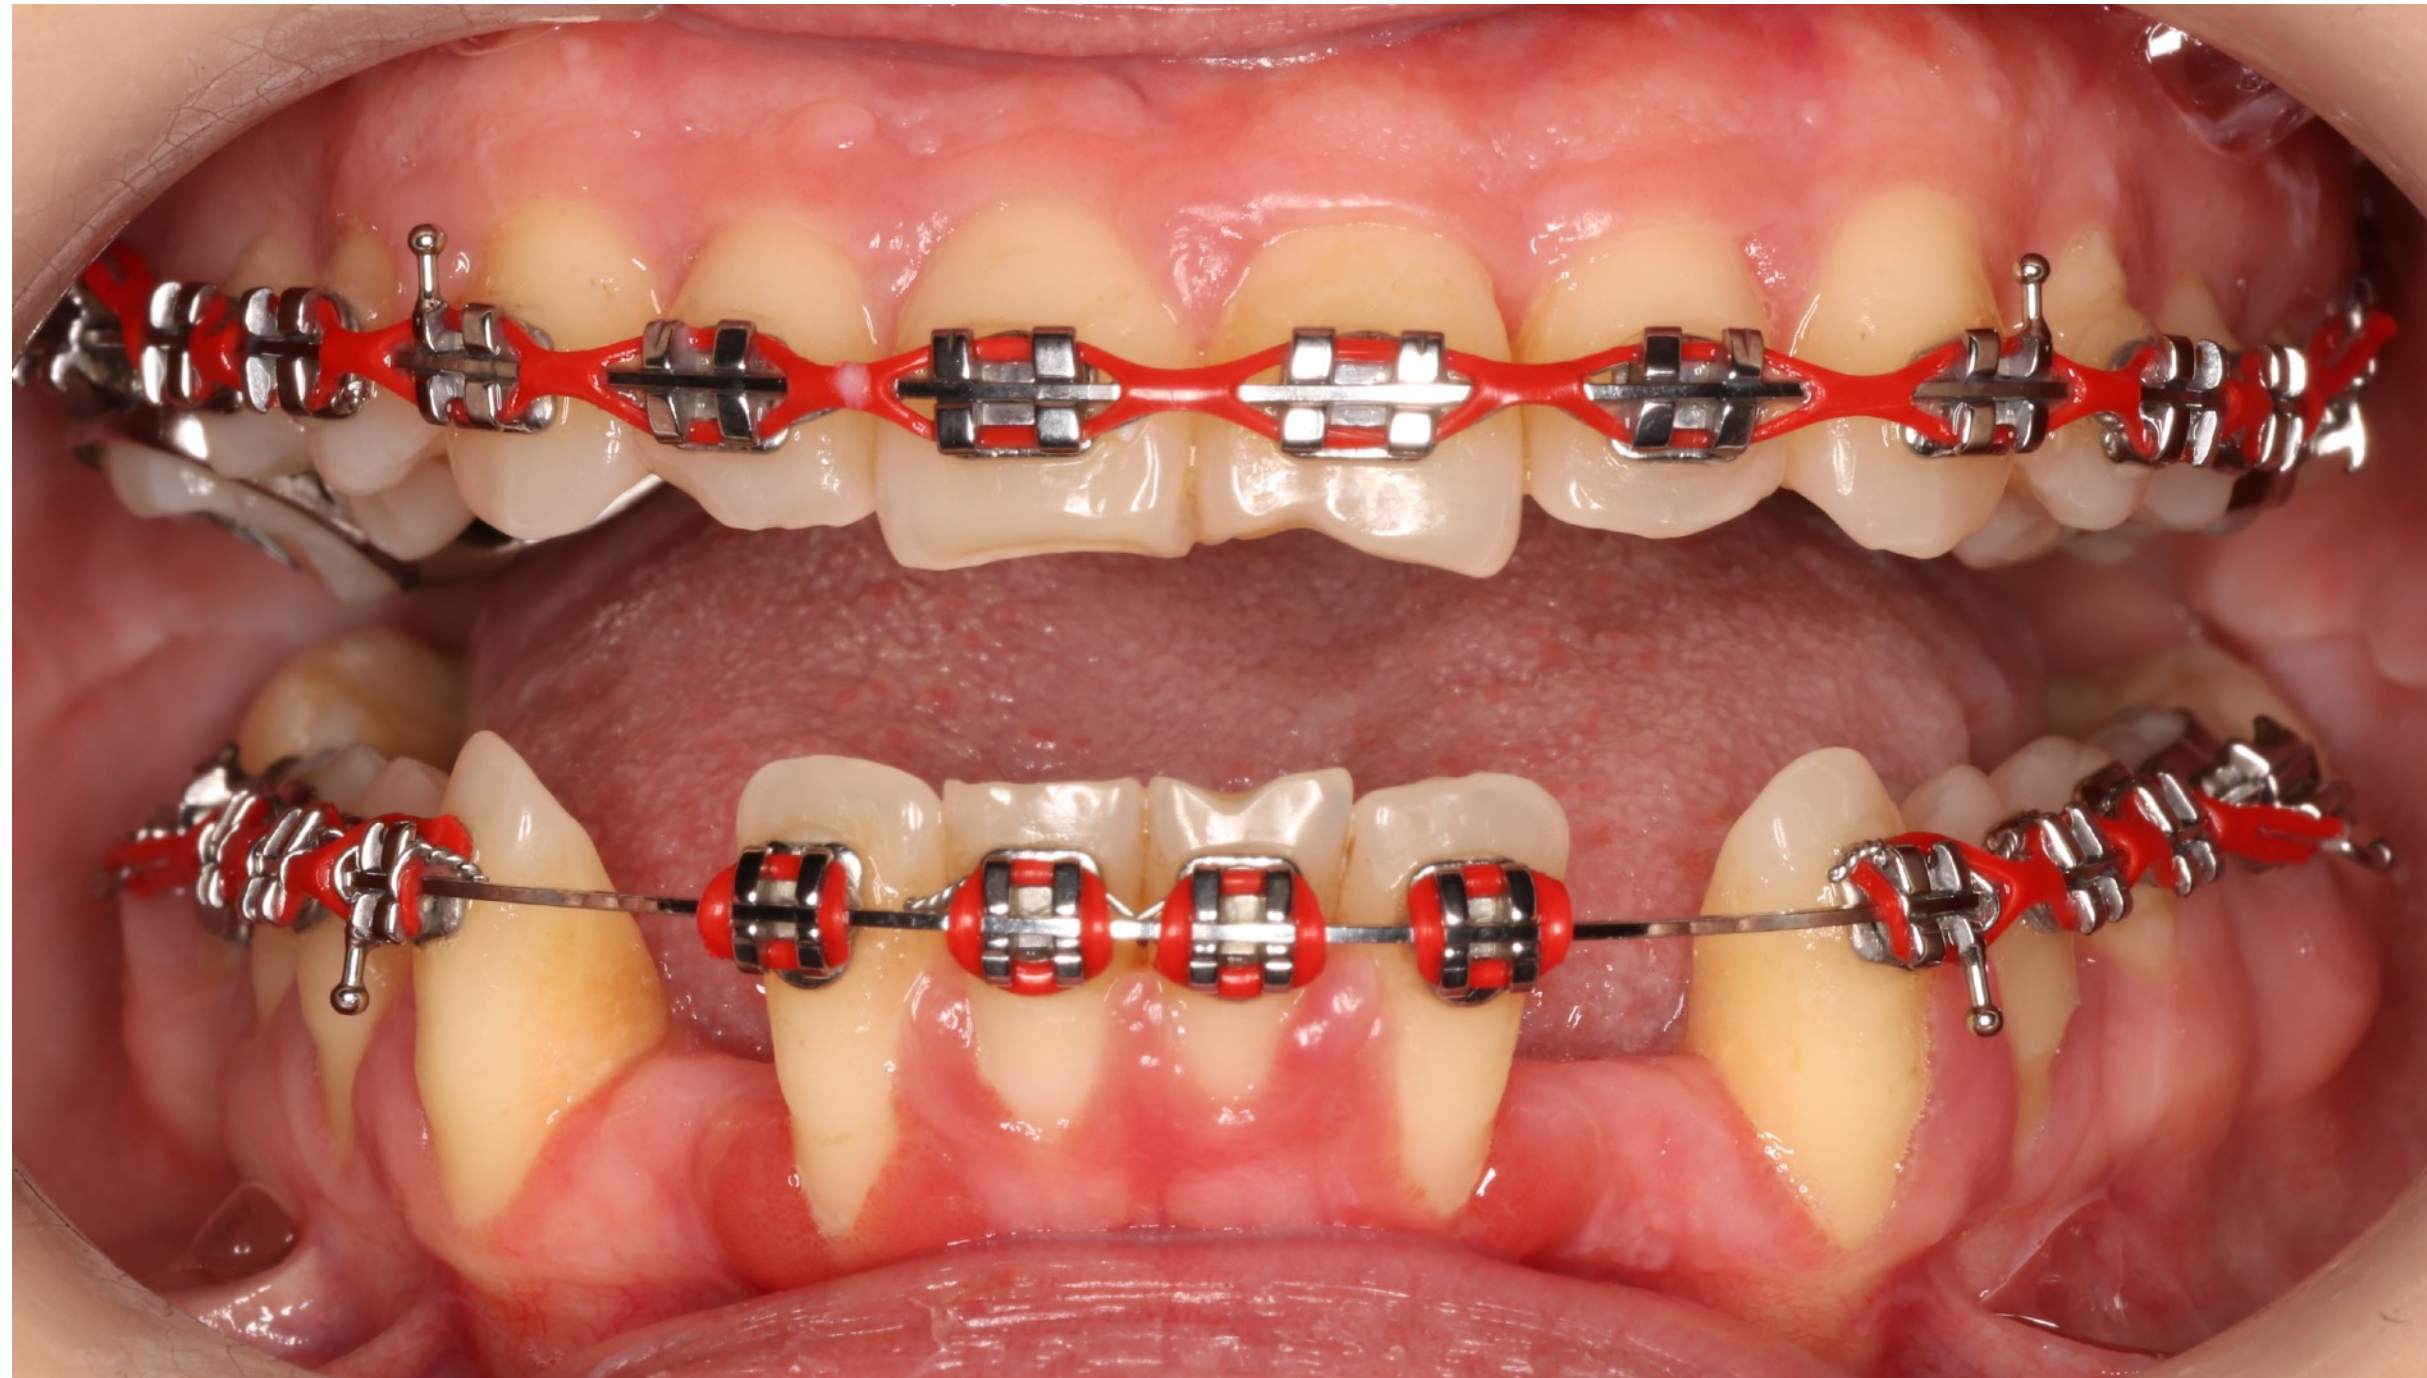

Arcada superioara
simetrică

Estetica unghiurilor incizale realizata cu ajutorul obturatiilor de compozit
